

The sky

Name:

Date:

Day:

The sky

The Sun sets in the west. The Sun is also a star. The Sun is very hot it gives us heat and light, it is a huge ball of fire. It shines so bright and it is yellow in color. We see the Sun while it's day.

Moon is Sphere and white it shines at night. The shape of the moon changes every night. The changing shape of the moon are called phases of the moon. Moon can be seen with stars at night.

stars are very big. You can not see them with Sun, you can only see them at night with moon. The sky is dark at night. You can play and enjoy in counting the stars. There are many stars in the sky.

Clouds are soft, white and grey, they float high, they are many in the sky. Dark clouds bring rain. We can see clouds at day and at night. During the day sky is blue in color.
